

IF *SHARP GLOBAL PARTNERS*
ISN'T WATCHING YOUR
SUPPLY CHAIN SECURITY

Then who is?

By hardening security in your supply chain and facilities, you CAN reduce exposure to security risk, comply with government-sponsored programs such as C-TPAT, and improve operational output and control.

A SAFE & SECURE SUPPLY CHAIN *IS GOOD BUSINESS!*

Examining your security practices will improve return on investment in the long run:

- Improve Organizational Communication
- Protect and Enhance your Brand Name
- Provide a Safe Work Environment
- Strengthen Security Procedures
- Increase Efficiency and Velocity
- Reduce Cargo Theft and Loss

Sharp Global Partners offers a wide array of additional services beyond those required by C-TPAT.

Enhance your security operations by implementing any one – or more – of the following:

- Recommendations for Security Products and Seals
- Formulation of Security Procedures and Manuals
- Background Check Procedures
- Executive Protection Programs and Planning
- PSVA (Personal Security Vulnerability Assessments)
- Risk Assessments and Services
- Business Continuation and Crisis Readiness Programs
- Global Intelligence
- Factory Inspections and Social Compliance (FLA)

C-TPAT COMPLIANCE

It requires a team effort to secure the global secure chain – those who join C-TPAT agree to develop and implement a verifiable, documented program to enhance security procedures throughout their supply chain process and then communicate these practices to all business partners and employees within their supply chain.

Participation in C-TPAT offers a multitude of benefits:

- Be an active player in the fight against terrorism
- Reduce border-crossing times
- Avoid costly inspections, delays and audits
- Work with an assigned account manager at Customs
- Become eligible for other cost-saving Customs programs

Minimum Security Requirements for C-TPAT announced March 25, 2005

The following criteria are now required for all new and existing C-TPAT members:

- Hardening of physical supply chain – including container and physical security; access control at importer's facilities
- Changes to Internal Supply Chain Management Practices – addressing personnel, procedural and IT security; training and threat awareness
- Selection and Verification of Business Partners – ensuring overseas partners, at point of origin, develop security procedures consistent with C-TPAT security criteria

Sharp Global Partners provides:

- C-TPAT Application Services
- C-TPAT Security and Risk Assessment
- C-TPAT Inspections and Supplier Verifications
- C-TPAT Security Awareness Training
- C-TPAT Security Procedures Reviews
- C-TPAT Validation Reviews

“The message should be clear: if a business takes steps to secure its cargo against terrorism, we will give it the ‘fast lane’

through the border.”

– Commissioner U.S. Customs & Border Patrol

SHARP GLOBAL

YOUR SUPPLY CHAIN SECURITY PARTNER

The principals and associates at Sharp Global Partners provide an unparalleled combination of logistics, regulatory and security expertise – ensuring that you spend your resources wisely and reduce risk in the most optimum way. Our worldwide network of security experts offers in-country expertise and knowledge across the globe.

Sharp Global Partners creates highly targeted, client-specific solutions, becoming your trusted security partner whenever and wherever needed. We offer everything from C-TPAT application procedures (new members), to C-TPAT compliance assistance (existing members) and a host of other security, intelligence and logistics solutions.

Hand in hand we will conquer terror in our lifetime. Together, our cooperation and commitment today will make the difference for our future generations. As part of our commitment to make our world free of terror we donate a portion of our profits to organizations who support those men and women on the frontlines of the war against terror.

We look forward to working with you as a trusted security partner.
